We're a bunch of software developers that love to code, play, learn, improve and eat pizza!

Every month we meet up in order to practice code katas, clean code, software craftsmanship, pair programming, Test-Driven Development and learn from each other for an hour or two. As it's after work, food and drinks are provided :)

If you'd like to learn more about Software Craftsmanship, the best place to start is *What Is Software Design?* by Jack Reeves. If you'd like more in-depth material, *Pete McBreen's Book: Software Craftsmanship: the new imperative* is great.
